

Answers to some questions:

1) How is the lottery conducted?

I (Bonnie) use a recipe card to put your name on the inside, fold and staple and put the time requested on the outside. I do this for each time slot you requested and then organize them into an envelope with all other requests for that time slot. Only one card per name goes into a 'hat' for that time slot. Butch draws a name for that slot and then we move on to the next envelope.

Example: B Robbins requests Monday 1 – 2:30. Four others want the same time so my name and those four will go into the envelope marked Monday 1- 2:30.

As we draw names we mark the time slot on our calendar. That name will be eliminated from future 'wins' for the first round of lottery. Butch will draw a second time if he draws a name that has already been assigned a slot.

2) Can I ask for the same time slot on all five of my choices and boost my chance of getting that slot?

No. The lottery process is intended to offer equal opportunity to all HT residents for the slot. A name is only given one 'ticket' in the hat for the time slot. You will lose the opportunity for a different time slot if they are all for the same day and time.

3) How can I boost my team's chance of getting our preferred slot?

Have all HT residents submit a request for that slot. If you have four players who are residents you should have them all submit a request for that preferred slot and boost your chance to four opportunities for the winning 'ticket'.

4) How do you verify the request is from a township resident?

I use the county equalization to verify property ownership in HT or the registered voter list for HT. If you are a renter or your property is not listed in your name, please include your address so we can verify your residency in the township. The idea is to allow the tax payers use of the facility they support with millage.

5) Can we attend the drawing?

Yes, we will be drawing at 7 PM on Aug 28th so I can send out notifications and give a 48 hour period for 'winners' to verify the time slot will work for them.
